

## Rabbit fatty acid (FA) ELISA kit

<b>Cat. No.:</b>	OB0625WXX-789
<b>Assay Type:</b>	Quantitative ELISA
<b>Target Species:</b>	Rabbit
<b>Assay Target:</b>	FA
<b>Size:</b>	48T; 96T

This product is for research use only and is not intended for diagnostic use.

### Product Overview

<b>Description</b>	Rabbit fatty acid (FA) ELISA kit is an ELISA-based <i>in vitro</i> research tool designed specifically for the quantitative detection of FA in rabbits with high sensitivity.
<b>Assay Principle</b>	The kit is based on FA antibody-FA antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect FA antigen targets in samples.
<b>Background</b>	Fatty acids (FAs) are carboxylic acids with an aliphatic chain and are diverse. Their metabolism can serve as a target for obesity treatment.
<b>Synonyms</b>	Carboxylic acid
<b>Formula Weight</b>	274,554 Da
<b>Applications</b>	Rabbit fatty acid (FA) ELISA kit is an important tool for the quantitative detection of FA in various biological samples of rabbit.
<b>Research Area</b>	Lipid metabolism; Obesity research

### Specification

<b>Sample Type</b>	Rabbit samples
<b>Cross-reactivity</b>	No significant cross-reactivity or interference was observed.
<b>Storage</b>	Store at 2-8°C.
