

Human adipogenin (ADIG) ELISA kit

Cat. No.:	OB0525WXX-205
Assay Type:	Quantitative ELISA
Target Species:	Human
Assay Target:	ADIG
Size:	48T; 96T

This product is for research use only and is not intended for diagnostic use.

Product Overview

Description	Human adipogenin (ADIG) ELISA kit is a ready-to-use ELISA kit for analyzing human ADIG levels and has high sensitivity and excellent specificity.
Assay Principle	The kit is based on the ADIG antibody-ADIG Antigen Interaction (Immunosorbent) and an HRP colorimetric detection system for the detection of ADIG antigen targets in samples.
Background	ADIG is an adipocyte-specific protein that plays a role in stimulating adipocyte differentiation and development.
Synonyms	NUP62
Formula Weight	9,465 Da
Applications	Human adipogenin (ADIG) ELISA kit is designed for the <i>in vitro</i> quantitative analysis of ADIG levels in human serum, plasma, cell culture supernatants, body fluid, and tissue homogenate samples.
Research Area	Adipocyte differentiation; Obesity

Specification

Sample Type	Serum; Plasma; Cell culture supernatants; Body fluid; Tissue homogenate
Cross-reactivity	No significant cross-reactivity or interference was observed.
Storage	Store at 2-8°C.
